Appl. No.: 10/695,958 In re Allmandinger, T. et al.

## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

<u>Listing of Claims:</u>

Claim 1 (currently amended): A drive axle assembly for a motor vehicle, said axle assembly comprising:

- a support beam member;
- a differential assembly module secured to said support beam member;
- a pair of axle shaft members outwardly extending from said differential assembly member; and

a cover member fastened to said support beam member to cover at least a portion said differential assembly module, said cover member having at least one access opening two coaxially spaced access openings therein each for receiving one of said axle shaft members therethrough;

said at least one access opening in said cover member provided with an adjustable scaling flange device provided to scal an interior cavity within said cover member between one of said at least one access opening openings and corresponding one of said axle shaft members extending therethrough;

wherein said adjustable sealing flange device being positionally adjustable relative to said
